Abstract of JP 2002099283 (A)

**PROBLEM TO BE SOLVED:** To provide a system and method for distributing music for facilitating finding a piece of music from unknown pieces of music to the preferences of a user connected with a music distribution server by a browser or the like on a terminal, in music distribution using a network such as the Internet; **SOLUTION:** When an audition is selected on a Web browser picture displayed on a user side terminal screen by making access to a Web server operating a music distribution system from the terminal, pieces of music with selling permission are successively transmitted to the user terminal in prescribed time units using a streaming technique, and the user pays attention to the transmitted pieces of music via a loudspeaker of the user terminal, and when there is any piece of music to the preference of the user, he/she can select the preferred piece of music on the browser picture displayed on the user side display, and thereby he/she can purchase the preferred piece of music.
